

Technical drawing of a road cross-section. The total width is 20.00m. The road is divided into sections: 6.50m (AVO-DJA), 0.50m (PIENNAR), 3.00m (AJORATA), 7.70m (PIENNAR), 0.50m (AVO-DJA), and 1.80m. The road surface is at elevation 0.00. The side slopes are 1:2. The road is bordered by KATUALUE (Kataja) on both sides. The road is constructed with the following layers (from top to bottom):

Layer	Material	Thickness
PÄÄLLYSTE	M 0-11	5 cm
KANTAVAKERROS	M 0-32	15 cm
JAKAVAKERROS	M 0-90	60 cm
SUODATINKANGAS	N 3	
YHTEENSÄ		80 cm

The drawing also shows the road's profile, including the side slopes (1:2) and the road's elevation relative to the ground level (0.00). The road is bordered by KATUALUE (Kataja) on both sides. The road is constructed with the following layers (from top to bottom):

PUOLELLA OLEVA TKITUS, M450

PUTKITUS, M450
